EDUCATION

University of Texas at Dallas — Bachelor of Science in Computer Science Expected December 2026
Relevant Coursework: Computer Networking, Computer Graphics, Data Structures & Algorithms, Database Systems, Computer Architecture, Unix Systems, Artificial Intelligence

TECHNICAL SKILLS

Web & Frontend: React, TypeScript, JavaScript, HTML/CSS, Vite, AWS (S3, CloudFront, Lambda, DynamoDB, IAM), Git
Databases & Data: SQL, MySQL, MySQL Workbench, DynamoDB, Relational Database Design, Query Optimization
Other Skills: Python, Java, C++, C#, SQL, Lua, Scrum, Ubuntu

WORK EXPERIENCE

University of Texas at Dallas — Office of Information Technology | Computer Lab Assistant March 2026 – Present
- Resolve over 30 technical support tickets weekly using campus helpdesk systems
- Volunteered to help the Automation Team create a Power Automate flow to remind the Sonora Lab staff to update their lab count
- Provide in-person software troubleshooting for student and staff devices, including laptops, phones, and tablets
- Train new staff on ticket workflow, the service catalog, and campus procedures

Market Street | Meat Cutter February 2018 – September 2026
- Collaborated with a team to maintain the sales floor and improve stock uptime during evening shifts
- Communicated with customers to resolve requests and manage wait times during peak business hours

PROJECTS

Personal Website & Portfolio | React • TypeScript • Vite • AWS • CloudFlare August 2026 – Present
- Built a React frontend hosted on S3 via CloudFront, with a serverless backend using AWS Lambda and DynamoDB
- Implemented a button that updates a DynamoDB table record using an IAM-scoped AWS Lambda Function URL

Airline Database App | Python • MySQL • JavaFX January – May 2026
- Built a Python API layer to integrate a MySQL database with a JavaFX frontend, supporting data access in a team of five
- Structured relational tables, linked foreign keys, and wrote efficient queries to support real-time data lookups
- Collaborated with the frontend team to accommodate new database requirements with minimal downstream changes

Sentence Completion App | MySQL • JavaFX August – December 2025
- Architected a 3-tier full-stack application using JavaFX and MySQL as backend programmer on a team of six
- Optimized the file import pipeline, cutting processing time by 80% and enabling import of full-length books
- Guided teammates by delegating tasks, contributing to a high overall impact on the final product

Skribble 'N Skram | Commercial indie game | Godot • Steamworks API • C# March 2024 – June 2026
- Led development of a commercial indie game using the Godot Engine and Steamworks API
- Developed AI systems for enemy behavior, utilizing both behavior trees and state machines
- Reviewed implementation approaches with teammates to reduce rework and maintain consistent architecture

Catball and the Ball Is a Cat | Commercial indie game | Godot • C# • Git • Linux June – July 2026
- Iterated on existing UI/UX by generating tooltips and standardizing a reusable UI theme
- Expedited code velocity by utilizing AI-assisted tooling, more than doubling team productivity

Cirkit Puzzle Game | Personal project | Luau • Roblox Studio July – December 2025
- Constructed client-server communication, leveraging Roblox Studio's local script to remote function pattern
- Designed levels with unique puzzles and iterated on a tutorial based on player feedback

Tornado Survival Game | Personal project | Unity • VRChat SDK • C# April – August 2025
- Designed and implemented a client-server networking system to support real-time multiplayer physics interactions
- Reduced network congestion by up to 50% by localizing repetitive physics collision updates

CAMPUS INVOLVEMENT

- SDGA Godot Softbody Game Jam — 3rd place ($300 prize), stress-tested a software add-on March 2026
- UTD Hackathon 2025 — Built an educational phishing-awareness minigame November 2025
- Contra Corners — Executive Officer, delivered on plans set by the president and cabinet October 2025 – Present
- Comet Wrestling — Member, weekly meets consisting of warmups, drills, and going live September 2025 – Present
